LOVELLS

SUSPENSION

FOR THE RIDE OF YOUR LIFE

The Company

In the commercially dark and uncertain days of the depression. Lovells Springs founder, George Lovell, took the courageous step of leaving the corporate security of Pioneer Railway Springs Pty Ltd to begin with his three sons, his own company in 1930.

George and his sons manufactured their own spring making equipment including furnaces and forming equipment and as a result of hard work, Australian ingenuity and determination the business flourished. Lovells has cemented their reputation as a world leader, manufacturer and supplier of premium quality springs and suspension components to suit a broad range of applications for automotive, defence, agriculture, mining and railway industries.

The company's philosophy of 'up to a standard, not down to a price' paired with a commitment to customer satisfaction and continuous improvement, provide basis for the quality of product, as well as the quality of business relationships developed with their clients.

Why Springs are Replaced

To achieve improvements in the following areas:

- ◆ Ride Height
- ◆ Handling
- ◆ Load Carrying Capacity
- ◆ Comfort
- ◆ **Ride Height**

To restore a vehicle to its original standard ride height, when the original springs have sagged or weakened. To lower the centre of gravity of the vehicle for enhanced appearance, performance and handling characteristics. To raise the vehicle for increased ground clearance and load carrying capabilities eg. offroad applications, towing, LPG tanks, load bearing accessories.

◆ **Handling**

Lovells Springs ratings exceed that of original equipment springs by around 10%-50% (depending on the application), therefore handling is dramatically improved by controlling excessive body roll and brake dive.

◆ **Load Carrying Capacity**

Lovells offer a vast range of heavy duty uprated coil and leaf springs to increase the vehicles load carrying capabilities and maintain stability when laden. These springs should be selected where a vehicle carries heavy loads, is used for towing, is fitted with LPG or larger fuel tank and other Load Bearing Accessories ie Bull Bar, winch, roof rack etc.

◆ **Comfort**

Lovells offer a range of variances in progressive and linear rate coil spring design, ratings and ride height options to enable the vehicle to be enhanced to the customer's exacting comfort requirements.

Suspension Range

Lovells Coil Springs Designed as a superior replacement part for mass produced O.E. (Original Equipment) coil springs. Lovells springs exceed original ratings by 10%-50%, thus handling is dramatically improved and many ride height variations are available for most makes of vehicles.

Lovells Coil Springs are manufactured to the highest standard from Australian made One Steel micro alloy spring steel.

Many Lovells Coil Springs are of a Progressive Rate design. This design enables a spring to increase in spring rate when you need it and decrease when you don't; ensuring the ultimate in handling and ride comfort. **5 YEAR unlimited km WARRANTY**

Suspension Range (Continued)

Lovells Leaf Springs

Lovells offer a vast range of semi elliptic leaf springs to satisfy popular ride height variations and load carrying capabilities. Lovells semi elliptic springs have the outstanding characteristics of not only acting as a spring, to resiliently support the vehicle, but also serve to position the axle, dampen vertical deflection and cushion both driving torque and braking reaction. Lovells leaf springs are manufactured to the highest standard from Australian made One Steel micro alloy spring steel.

5 YEAR unlimited km WARRANTY

Lovells Urethane Suspension Components

On going development in urethane technology has evenuated in Lovells being able to offer a urethane suspension bush that permits the comfortable ride, associated with rubber bushes, yet with the crisp handling geometry control and durability of urethane. The technology allows #60, #75, durometer

urethane to survive the harshest of suspension applications and durability to match. Lovells

Urethane Suspension Components are covered by a 2 YEAR/ 40,000km WARRANTY

Lovells Shock Absorbers (Series III)

GAS LEGEND TWIN-

TUBE GAS CHARGED; 40mm bore and huge 60mm expanded body design provides up to twice the oil capacity of Original Equipment shock absorbers to maximise fade resistance, run cooler and allow fast reaction time to road changes.

Gas Legend Twin-Tube shock absorbers feature:

- ◆ Teflon banded steel pistons and nylon mechanical top out stops.
- ◆ Piston retainer nuts, mechanically peened to stop failure at high temperature.
- ◆ Multi stage valving system to allow a progressive dampening effect from slow to fast piston velocity thus automatically adjusting to all conditions.
- ◆ Shafts are manufactured from tough 20mm hardened chrome micro alloy steel, precision engineered to withstand the harshest of environments, while reducing friction and wear.
- ◆ Piston rod seals are Viton high quality, high temperature multi-lip design to again reduce friction and provide longer life.
- ◆ Robust 1.5mm thick external and internal walls.

- ◆ Gas charged with low pressure nitrogen gas to maximise fade resistance under extreme conditions without harshness while providing more responsive control.
- ◆ All eyes and pin mounts are doubled welded for extra strength and long life.

Lovells Gas Legend Shock Absorbers are covered by 3 YEAR/ 70,000km WARRANTY.

Lovells Steering Dampers/Stabilisers

GAS LEGEND HEAVY DUTY and RETURN TO CENTRE; Large capacity replacement steering dampers have a 30mm bore and piston and incorporate Foam Cell technology.

Reduce unwanted steering vibration and harshness on rough roads, without interfering with normal steering control. Absorbs steering shock and vibration caused by road irregularities such as cracks, corrugations, holes, rocks and wheel tracks.

Gas Legend Steering Dampers feature:

- ◆ Superior 12.5mm hard chrome piston rod.
 - ◆ Tough cold coiled coil spring on RTC versions.
 - ◆ 50/50 Multi stage valving system to allow a progressive dampening effect from slow to fast piston velocity thus automatically adjusting to all conditions.
 - ◆ Mounts are Robotic Double Welded
- Lovells Gas Legend Steering Dampers are covered by 3 YEAR/ 70,000km WARRANTY.

Lovells Heavy Duty Torsion Bars

Bars are available as an up grade to enhance the load carrying ability of vehicles which have independent front ends. Lovells Torsion Bars are manufactured with larger diameter bar than original equipment which will increase spring rate and maintain ride height when the vehicle is fitted with load bearing accessories (LBA) over the front. Eg. Bull bar or winch. Lovells Torsion Bars feature 'upset' forged ends which increase strength by improving the steel structure and rolled splines. Lovells heavy duty torsion bars are covered by a 2 YEAR/ 40,000 km WARRANTY

Suspension Range (Continued)

Lovells Shackles & Pins

Manufactured using the finest quality materials and case hardened to 0.2mm, to provide greater resistance to wear, thus increasing pin and bush life. Machined load bearing surfaces allow for increased dispersion and coverage of grease, which greatly improves performance and reduces shackle and pin deterioration.

All Lovells shackles, plates and pins are manufactured to exceed Original Equipment specifications. The majority of Lovells shackles and pins are fully greaseable with easy accessible grease nipples and come complete with nuts & washers.

Lovells shackles and pins are covered by a 2 YEAR/ 40,000km WARRANTY.

Lovells U-Bolts

Manufactured from high tensile premium quality cold formed rod, incorporating rolled threads to ensure material structure continuity and increased strength. Lovells U-bolts are coated with a rust preventative for long life and come complete with high tensile deep nuts and spring washers. Lovells U-bolts are covered by a 2 YEAR/ 40,000km WARRANTY.

Lovells Suspension Kits

Lovells offer complete 4x4 suspension kits, with properly 'matched' components to ensure vehicle handling characteristics and load carrying ability are correct, safe and uncompromised. To achieve this, Lovells initially carry out an evaluation of a vehicle via road testing, component analysis and performance and specification examination. Road testing involves driving a vehicle over many types of terrain, with and without loads before subjective

judgement is made on how Lovells could improve the performance of the vehicle in terms of ride height, handling, load carrying capacity (up to the manufacturers recommended GVM). Suspension systems are then designed as a combination to ensure spring rates, suspension travel and handling compliment our shock absorber controls and other components. Performance including load capabilities verses ride comfort is also taken into consideration. Engineering samples are left on a vehicle for *durability* testing for periods of up to 12 months.

Lovells Gross Vehicle Mass (GVM) Upgrades and Towing Upgrades (BTC Upgrades)

The solution for owner/managers of most popular 4x4 vehicles who need to carry and tow loads beyond OE capacities while at the same time meeting practical and documentary compliance requirements of Work Safety, Police Licensing, Insurance, Lessors and Fleet Managers.

The Lovells GVM and BTC upgrade kits have been strenuously studied, tested and refined. In conjunction with leading Engineering Signatories and have been fitted to many of Australia's largest fleets during the past twenty years. Lovells GVM Upgrade Kits have full Federal Compliance by the Department of Infrastructure, Transport, Regional Development and Local Government and all have specific Compliance plate Approvals and Compliance plates fitted to prior to registration. They are simply then registered with a new GVM as per the new compliance plate.

Lovells GVM Upgrade and BTC Upgrade Kits come complete with all suspension components, All Terrain Offroad Hitch, new compliance plate and full fitting and testing procedures.

Ride Height Options

Vehicle ride heights (Eye Brow Heights) are measured vertically from the centre of the wheel hub to the edge of the guard.

Vehicle ride heights are approximate only and can vary depending on:

- ♦ Age of vehicle
- ♦ Load Bearing Accessories (ie. bullbars, winches, extra fuel tanks, fridges, spare wheel carrier etc.)

When selecting springs all of the these factors must be taken into consideration.

Eye Brow Height

Measuring of the "Eye Brow Height -E.B.H." is illustrated in the following Diagram

FRONT / REAR

IMPORTANT: Pay close attention to all symbols, foot

Designation	Approximate ride height change
Std Height	Standard
H/Duty Std Height Raised	Maintains Std Height when vehicle is fitted with Load Bearing Accessories. Raises vehicle by approx 25-50mm
Raised H/Duty	Maintaining raised height when vehicle is fitted with Load Bearing Accessories - increasing load carrying capacity.
Additional Part No. Prefix	<p>HD - (Heavy Duty) extra heavy duty for increased load carrying capacity ie. larger fuel tanks, LPG tanks, camping / trekking cargo.</p> <p>LTO - (Long Travel Option) suits 4x4 vehicles with aftermarket shock absorbers which are normally longer than original and enable coil spring to remain trapped. LTO part numbers also suit O.E. original length shock absorbers.</p> <p>HDLTO - (Heavy Duty Long Travel Option) above two descriptions combined, suits 4x4 vehicles with longer shock absorber & increases load carrying capacity.</p> <p>NOTE: Spring selection for vehicles with L.B.A must be scrutinised carefully as variables such as location of equipment may change from vehicle to vehicle. The above details are given as an average only. Please consult Lovells Springs Pty. Ltd. for further details.</p>

Customer Specific Design and Spring Identification

If the springs you require are not listed in the catalogue, please make enquiries with our customer service technicians who will arrange for the manufacture of custom springs to your specification and / or sample.

To achieve initial design parameters we will require the following:

Static (working) height: The length of the coil spring whilst still mounted in the vehicle under normal load.

Trapped height: The overall length of a coil spring

when still in the vehicle while the body of the vehicle jacked up, to full extension of shock absorber.

Free height: The overall length of a coil spring at its longest part while not under load i.e. out of the vehicle

notes and advice in this catalogue.

INSTALLATION OF RAISED SUSPENSION SYSTEMS CAN INCREASE THE RISK OF VEHICLE ROLL OVER

Customer Specific Design and Spring Identification (Cont.)

Diameter of material: Use Vernier caliper to measure. Check at various points along coil and then check end coils as the diameter may vary.

Inside diameter (I.D.): Use Vernier caliper to measure inside diameter of coil spring at both ends. Measure coil spring whilst out of vehicle.

Spring end finish:

Normal: Unground, straight cut.

Ground: Ground flat

Reduced: End coil finishes smaller in diameter than main coils.

Fitting Guide

1. With vehicle on level (flat) ground, measure and record corner heights (E.B.H) from centre of rim to wheel arch.
2. With vehicle on flat ground measure and record static (working) height of O.E.M.(original) coils.(length of coil under load).
3. Lift vehicle and record trapped height of coil springs from front and rear. (wheels at full droop with springs and shocks still in vehicle).
4. Check inside diameter, top and bottom, of spring against O.E.M.(original) coils
5. Remove old suspension in accordance with vehicle manufacturers manual.
6. Reassemble new suspension components and fit to vehicle. Note: Final tensioning of all bolts & nuts to be done with suspension at normal ride height. Failure to observe this requirement may void any warranty.
7. Align vehicle to manufacturers specifications. Place vehicle on level ground and record final corner heights (E.B.H) from centre of rim to wheel arch.

Important: U-bolts must be checked regularly & retensioned.

For Maximum leaf spring life, after fitment of new leaf springs, U-bolts must be retensioned after 500klm with vehicle fully laden.

Lovells recommend all U-bolts to be checked regularly & retensioned if required. Torque settings are available upon request.

Glossary

Symbol	Description
All	All engine sizes within year of manufacturer
D	Diesel Powered Engines
P	Petrol Powered Engines
T	Turbo
□	Model on going
H/Top	Hard Top
S/Top	Soft Top
T/Back	Tray Back or Cab Chassis
P/Up	Pick Up or Utility
D/Cab	Dual Cab
Xtra Cab	King Cab
S/Rig	Spray Rig (suits vehicles with water tanks eg fire trucks etc)
M/Use	Mine Use
GVM	Gross Vehicle Mass Upgrade
MD	Medium Duty
XHD	Extra Heavy Duty
LWB	Long Wheel Base
SWB	Short Wheel

Catalogue Information

GVM	ISUZKIT006-GVM	1	GVM UPGRADE KIT (Fitted Price)	\$ 4,800.00

The solution for owners/managers of Isuzu D Max 4x4 vehicles who have a need to carry loads to a GVM of 3600kg (up from 2950kg standard GVM), while at the same time meeting the practical and documentary compliance requirements of Work Safety, Police Licensing, Insurance, Lessors and Fleet Managers.

This kit is complied by Department of Infrastructure and Transport and comes complete with a Second Stage Manufacturers compliance plate. (Australian Compliance ONLY)

Lovells Compliance Plate Approval Number (CPA) 48580

Note: Above price is net and no discounts apply. Lovells Authorised Fitters (holding Production Facility ID) are entitled to a Fitters Price. (Available upon application)

Above price includes fitting by a Lovells Authorised Fitter and does not include GST

*****NOTE: The above GVM Upgrade can be supplied under State Compliance (for already registered vehicles) and the vehicle individually engineered for the State of registration. Includes State engineering certificate or certification plate. Kit part numbers, order forms, details and pricing are available upon application**

GVM	FORDKIT009-GVM	1	GVM UPGRADE KIT (Fitted Price)	\$ 5,000.00

The solution for owners/managers of Ford Ranger PX and Mazda BT50 MY12 vehicles who have a need to carry loads to a GVM of 3500kg (up from 3200kg standard GVM), while at the same time meeting the practical and documentary compliance requirements of Work Safety, Police Licensing, Insurance, Lessors and Fleet Managers. This kit is complied by Department of Infrastructure and Transport and comes complete with a Second Stage Manufacturer compliance plate. (Australian Compliance ONLY)

Lovells Compliance Plate Approval Number (CPA) 47037

Note: Above price is net and no discounts apply. Lovells Authorised Fitters (holding Production Facility ID) are entitled to a Fitters Price. (Available upon application)

Above price includes fitting by a Lovells Authorised Fitter and does not include GST

*****NOTE: The above GVM Upgrade can be supplied under State Compliance (for already registered vehicles) and the vehicle individually engineered for the State of registration. Includes State engineering certificate or certification plate. Kit part numbers, order forms, details and pricing are available upon application**

12	64611016	2	Rear Gas Legend Shock Absorber	\$ 198.00

Note: Front STRUTS P/N 64611015 are supplied with a gold removable lower spring seat & a 10mm spacer tube. The spacer tube will raise the front height by an extra 15mm if required. Lovells recommend using the spacer for Raised (B Kit) when steel bull bar and winch are fitted. Lovells do not recommend using the spacer with Raised Heavy Duty (C Kit).

SUSPENSION KITS

Kit Type	Part No.	Qty. per vehicle	Kit Description	List Price EACH
B	MITSKIT014-B	1	RAISED	\$ 2,186.76
C	MITSKIT014-C	1	RAISED HEAVY DUTY	\$ 2,231.34

ACCESSORIES (Not included in Kit)

Item	Part No.	Qty. per vehicle	Accessory Description	List Price EACH
1A	N13208	1	Front Urethane Kit- Steering Rack & Pinion Mount	\$ 125.78
2A	N53292	1	Front Urethane Bush Kit- Control Arm- Lower Inner	\$ 223.97
3A	N53293	1	Front Urethane Bush Kit- Control Arm- Upper Inner	\$ 122.08
4A	24211002	1	Driveline Anti-Vibration Alignment Kit	\$ 1,846.00

Highlighted Accessories: Lovells strongly recommend fitting these accessories when using Raised OR Raised Heavy Duty springs.

Note: When fitting raised rear springs to this vehicle, driveline vibration can occur. Lovells recommend using the above driveline anti-vibration alignment kit.
Kit includes new complete twin assembly drive shaft, new firmer centre bearing, sliding splines and double cardan to cater for increased driveline angles. Note that this kit may not totally eliminate vibration/shudder. Above price is special net and no discount applies.

8	LGPK387-2	2	Rear Pin Kit (Non Greasable)	\$ 35.20
9	64610010L	2	Front Gas Legend Strut	\$ 235.00
10	6462258N	2	Rear Gas Legend Shock Absorber	\$ 198.00

Note: Front STRUTS P/N 64610010L are supplied with a gold removable lower spring seat & a 10mm spacer tube. The spacer tube will raise the front height by an extra 15mm if required to compensate for extra weight only and to trim vehicle height. Lovells do not recommend using the spacer for Raised (B Kit) when steel bull and winch are fitted. Lovells do not recommend using the spacer with Raised Heavy Duty (C Kit) as this will void warranty.

*******Lifetime Warranty on Platinum Series Coil Springs*******

Lovells Platinum Series

Lovells Platinum Series Coil Springs are Computer designed and manufactured from centerless ground X4K Premium Onesteel Bar. All coil springs are individually sonically crack tested and are coated in a high gloss Platinum Powder for long life. The Platinum Series Kit is designed for constant load applications, ideally suited for expedition and long haul adventures.

Lovells Platinum Series Kits have been trialed and tested by several high profile Tag Along 4x4 Tour Operators over several years and thousands of arduous kilometers. Lifetime unlimited km warranty on Platinum Series coil springs to the original retail purchaser.

GVM	NISSKIT020-GVM	1	GVM UPGRADE KIT (Fitted Price)	\$ 4,409.00

The solution for owners/managers of Nissan Patrol GU Cab Chassis vehicles who have a need to carry loads to a GVM of 3900kg (up from 3400kg standard GVM), while at the same time meeting the practical and documentary compliance requirements of Work Safety, Police Licensing, Insurance, Lessors and Fleet Managers. This kit is complied by Department of Transport and Regional Services and comes complete with a secondary manufacturers compliance plate. (Australian Compliance ONLY)

Lovells Compliance Plate Approval Number (CPA) 28971

Note: Above price is net and no discounts apply. Lovells Authorised Fitters (holding Production Facility ID) are entitled to a Fitters Price. (Available upon application)

Above price includes fitting by a Lovells Authorised Fitter and does not include GST

TECHNICAL BULLETIN P/N CH001 – Front ABS Spacer

Subject: NISSAN PATROL GU FRONT LONG TRAVEL SUSPENSION

Lovells Springs Pty Ltd publish this information in order to maintain safety standards and to assist in correct application and performance of Lovells products.

The Nissan GU Patrol (Y61) is available with ABS brakes. This system employs an additional brake hose to the front left side of the axle housing. In its standard form, the hose will be stretched, if long travel shock absorbers are fitted.

A simple kit has been developed that raises the mounting point of the flexible brake hose coupling sufficiently to allow safe fitment of long travel shock absorbers.

The part number for this kit is CH001 and it consists of a 25mm spacer, a M8 x 1.25 x 55mm bolt, a spring washer and fitting instruction as shown.

Lovells strongly recommend that this spacer be fitted when using Raised or Raised Heavy Duty Coil Springs and Lovells Gas Legend Shock Absorbers.

GVM	TOYKIT073-GVM-ST	1	GVM UPGRADE KIT (Fitted Price)	\$ 5,000.00

The solution for owners/managers of Toyota Hilux 150 Series vehicles who have a need to carry loads to a GVM of 3300kg (up from: 2835kg- Single Cab ---- 2780kg- Dual Cab ---- 2710kg- Xtra Cab standard GVM) while at the same time meeting the practical and documentary compliance requirements of Work Safety, Police Licensing, Insurance, Lessors and Fleet Managers.

Note: Above price is net and no discounts apply. Lovells Authorised Fitters (holding Production Facility ID) are entitled to a Fitters Price. (Available upon application)

Above price includes fitting by a Lovells Authorised Fitter and State Engineering Inspection and does not include GST.

*****NOTE: The above Gross Vehicle Mass Upgrade kit, for Federal Compliance under Secondary Manufacturers Approval with compliance plate, is no longer available - Expiration September 2015. Refer current CPA for Toyota Hilux GUN126R 10/15 on build date. The above kit can still be supplied without compliance for individual state engineering for GVM upgrade. Price includes State Engineering Certificate or Type Approval plate. Note: Only available in Victoria, NSW SA, NT, ACT, WA & Queensland*****

TECHNICAL BULLETIN

P/N LSPV001– Extension Nut LSPV Adjustment

Subject: TOYOTA HILUX 150 Series Build date: 3/05 on - Brake Bias
Revision A- 18th November 2008

Lovells Springs Pty Ltd publish this information in order to maintain safety standards and to assist in correct application and performance of Lovells products.

When fitting Lovells Raised or Raised H/Duty rear leaf springs to Toyota Hilux, it is essential to adjust the LSPV (Load Sensing Pressure Valve) if fitted to ensure correct braking performance.

The connecting link at standard height with Original Equipment rear leaf springs is 160mm (measured from the centre of the eye to the bracket on the valve). When raised rear leaf springs are fitted, this needs to be lengthened to 200mm.

Prior to fitment

Adjustment

LSPV001

LSPV001 Fitted

1. Disconnect the LSPV link from the vehicle. Reusing the existing nut as a lock nut, fit the Extension Nut (LSPV001).
2. Adjust the Extension Nut until the overall length measures 200mm, from the centre of the eye to the end of the link.
3. Re-fit the link to the vehicle.

Lovells strongly recommend that this part number be fitted when using Raised or Raised Heavy Duty rear leaf springs.

Brake line pressure testing and brake inertia testing must be performed after fitment of this part number to ensure correct braking performance.

Brake line Pressures after fitting:

Front: 9,000 kPa

Rear: 8,000 kPa

Brake testing (line pressures and inertia) should be performed with vehicle loaded.

Includes State engineering certificate or certification plate. Kit part numbers, order forms, details and pricing are available upon application**

TECHNICAL BULLETIN

P/N CH002– Rear Brake Line Spacer

Subject: TOYOTA HILUX GUN126R Series Build date: 10/15 on
1st May 2016

Lovells Springs Pty Ltd publish this information in order to maintain safety standards and to assist in correct application and performance of Lovells products.

When fitting Lovells Raised or Raised H/Duty rear leaf springs to Toyota Hilux, it is essential to fit a brake line spacer to ensure the brake line is not over extended. A simple kit has been developed that raises the mounting point of the flexible brake hose coupling sufficiently to allow safe fitment of raised leaf springs.

CH002 Spacer

CH002 Fitted

1. Remove original bolt from brake line bracket on differential housing (passenger side) and fit spacer between bracket and differential housing using new bolt supplied.
2. You will need to slightly bend metal tab on bracket to align correctly.

TECHNICAL BULLETIN

P/N HLAR001– Headlight Potentiometer Link Adjustment

Subject: TOYOTA HILUX GUN126R SR5 Build date: 10/15 on

Lovells Springs Pty Ltd publish this information in order to maintain safety standards and to assist in correct application and performance of Lovells products.

When fitting Lovells Raised or Raised H/Duty rear leaf springs to Toyota Hilux, it is essential to adjust the headlight trim link to the potentiometer which is located between the Passengers Side rear leaf spring and the shackle.

Original Equipment

HLAR001 Fitted

SR5 Models only.

Must be performed on a level surface, preferably on a four post hoist.

1. With the new springs installed, remove the Original Equipment link from the potentiometer arm and fit new HLAR001 as per above image.
2. Adjust HLAR001 so the arm on the potentiometer is parallel with the ground or 0 degrees with a protractor.
3. When adjustment is correct, tighten lock nuts on turn buckle link adjuster.

SUSPENSION KITS

Kit Type	Part No.	Qty. per vehicle	Kit Description	List Price EACH
GVM	TOYKIT082-GVM	1	GVM UPGRADE KIT (Fitted Price)	\$ 4,800.00

ACCESSORIES (Not included in Kit)

Item	Part No.	Qty. per vehicle	Accessory Description	List Price EACH
1A	CH002	1	Rear Brake Line Extension Kit	\$ 25.00
2A	HLAR001	2	Headlight Adjusting rod (SR5 only)	\$ 50.00
3A	SBS-002	1	Front Sway Bar Spacer Kit	\$ 186.00

The solution for owners/managers of Toyota Hilux GEN 8 2WD vehicles who have a need to carry loads to a GVM of 3500kg (up from 3000kg standard GVM), while at the same time meeting the practical and documentary compliance requirements of Work Safety, Police Licensing, Insurance, Lessors and Fleet Managers. This kit is complied by Department of Infrastructure and Transport and comes complete with a Second Stage Manufacturer compliance plate. (Australian Compliance ONLY)

Lovells Compliance Plate Approval Number (CPA) 42909

Note: Above price is net and no discounts apply. Lovells Authorised Fitters (holding Production Facility ID) are entitled to a Fitters Price. (Available upon application)

Above price includes fitting by a Lovells Authorised Fitter and does not include GST

*****NOTE: The above GVM Upgrade can be supplied under State Compliance (for already registered vehicles) and the vehicle individually engineered for the State of registration. Includes State engineering certificate or certification plate. Kit part numbers, order forms, details and pricing are available upon application**

Kit Type	Part No.	Qty. per vehicle	Kit Description	Retail Price
GVM	TOYKIT042-GVM-ST	1	GVM UPGRADE KIT (Fitted and Complied Price)	\$ 4,909.00

The solution for owners/managers of Toyota Landcruiser 79 Series Cab Chassis vehicles who have a need to carry loads to a GVM of **3700kg** (up from 3200kg standard GVM), while at the same time meeting the practical and documentary compliance requirements of Work Safety, Police Licensing, Insurance, Lessors and Fleet Managers.

Note: Above price is net and no discounts apply. Lovells Authorised Fitters (holding Production Facility ID) are entitled to a Fitters Price. (Available upon application)

*****NOTE: The above Gross Vehicle Mass Upgrade Kit, for Federal Compliance under Secondary Manufacturers Approval with compliance plate, is no longer available - Expiration Feb 2007. Refer current CPA for Toyota Landcruiser 70 Series. The above kit can still be supplied without compliance for individual state engineering for GVM Upgrade. Price includes State engineering certificate or Blue Plate. Note: Only available in Victoria, NSW, SA NT, WA and Queensland*****

4A	N63043	1	Rear Lower Trailing Arm Assembly	\$ 421.66
5A	N63036	1	Rear Upper Trailing Arm Assembly- Adjustable	\$ 478.36

Highlighted Accessories: Lovells strongly recommend fitting these accessories when using Raised OR Raised Heavy Duty coil springs.

IMPORTANT:

Lovells advise that Torsion Bars on this vehicle must not be raised above OE height as this has the potential to promote failure of either the Torsion Bar Spline Mounts, Lower Control Arm and Shock Absorbers.

The optimum position of the front end is where the shock absorber is positioned in the middle of its stroke. It should also be noted that this vehicle does not come equipped with Upper Bump Stops.

TECHNICAL BULLETIN

Kinetic Dynamic Suspension System Adjustment

Subject: TOYOTA LANDCRUISER 200 SERIES – Procedure

Version 2 18th June 2009

Lovells Springs Pty Ltd publish this information in order to maintain safety standards and to assist in correct application and performance of Lovells products.

Please Note:

The Toyota Landcruiser 200 Series and Lexus LX Series are fitted with Toyota's Kinetic Dynamic Suspension System (KDSS), also referred to as "hydro-mechanical semi active anti roll bar". When fitting Lovells Coil Springs and Lovells Gas Legend Shock Absorbers please refer to the following procedures:

1. Suspend vehicle on a 2-post chassis hoist allowing wheels to hang (full droop).
2. Locate the KDSS valve housing. **NOTE:** The valve housing is located on the left-hand side of the vehicle, on the inside of the chassis rail, approximately halfway between the front and the rear of the vehicle.
3. **IMPORTANT:** Using a 5mm hex key, check that the two leveling valves are tight in the valve housing (turning clockwise), before going to step 4.
4. Using a 5mm hex key, open the two levelling valves three (3) full rotations in the anti-clockwise direction. (Access is from underside of the KDSS valve)

Note: The KDSS system is now open and the sway bar ends should now be able to be manipulated with little effort, allowing spring/strut removal and installation.

CAUTION: THE VEHICLE MUST NOT BE DRIVEN WITH THESE VALVES OPEN AS THIS WILL COMPROMISE THE SYSTEM AND RENDER THE VEHICLE UNSAFE TO DRIVE.

5. Once Lovells Suspension components are fitted and with the vehicle sitting on level ground, close both KDSS leveling valves by turning them in a clockwise direction to tighten.

KDSS Valve Procedure

TECHNICAL BULLETIN

Kinetic Dynamic Suspension System Equipped Vehicles Fine Tuning of Vehicle Lean

**Subject: TOYOTA LANDCRUISER 200 and TOYOTA PRADO 150
Procedure (Revision B- 4th July 2019)**

Lovells Springs Pty Ltd publish this information in order to maintain safety standards and to assist in correct application and performance of Lovells products.

Please Note:

The Toyota Landcruiser 200 Series and Toyota Prado 150 Series are fitted with Toyota's Kinetic Suspension System (KDSS), also referred to as "hydro-mechanical semi active anti roll bar". When fitting Lovells Coil Springs and Lovells Gas Legend Shock Absorbers please refer to the following procedures for fine tuning of the inherent vehicle lean which is encountered on approximately 1 in 10 vehicles.

Please take into consideration, KDSS adjusts accordingly to increased spring rates, vehicle load, camber angle of roads, aftermarket rear suspension airbag inflation, resistance and offroading/four wheel driving conditions. Resetting and trimming of KDSS is a serviceable adjustment, not a warrantable repair. If a vehicle develops a lean after initial install, consider the following checks and adjustments.

1. Check original install Data Capture Form to determine the difference of KDSS increased height since install.

If KDSS has increased (on the passenger side of the vehicle) between 5-10mm perform KDSS reset procedure as per Lovells Install Instructions.

2. If the KDSS system has increased more than 15mm, check if both front struts have equal spacer rings installed on Passenger and Drivers front struts.
3. If both struts have equal spacer rings ie. 10mm or 15mm, you will need to change the offset by 10-15mm subject to load bearing accessories. Remove 10 or 15mm spacer ring on Passenger side front strut spacer ring. Ref images below. Leaving Drivers Struts higher by 10-15mm.
4. This procedure will level the front end heights as close as possible to even (Passenger side to Drivers side). This procedure will also cross counter-leaver Drivers side Front to Passenger side Rear corner. Factory specifications note D/S to P/S offset of up to 12mm is acceptable.
5. Ensure KDSS reset procedure is performed as per Lovells Fitting Instructions when any suspension works are being performed.
6. Should the above procedure not trim heights within 25mm from D/S to P/S, please utilise Lovells P/N KDSS200-Spacer which fits on D/S strut top mount between strut top/top hat and chassis cradle. (LC200 only).

CAUTION: THE FRONT EBH (CENTRE OF HUB TO LIP OF GUARD MEASUREMENT) SHOULD NOT, EXCEED 565mm (LC200), OTHERWISE CORRECT WHEEL ALIGNMENT SPECIFICATIONS MAY NOT BE ACHIEVED, CAUSING PREMATURE TYRE WEAR. BEYOND THIS EBH WILL ALSO INCREASE CV ANGLES WHICH IS NOT RECOMMENDED.

Passenger Side (P/S) Strut Spacers.
Remove spacer rings to achieve a 10mm-15mm offset between P/S and D/S.

Drivers Side (D/S) Strut Spacers.
Add spacer rings to achieve a 10mm-15mm offset between D/S and P/S.

Drivers Side (D/S) Strut Top Spacer P/N KDSS200-Spacer.
Add to D/S strut top if D/S to P/S offset exceeds 25mm after first trim procedure (LC200 only).
